PROFESSIONAL SUMMARY

Client-facing QA/SDET professional with 1+ year of experience supporting a large-scale GST compliance product at TO THE NEW. Experienced in translating business requirements into test scenarios, coordinating with Business Analysts, Developers and client stakeholders, tracking issues through Jira, validating APIs with Postman, and communicating delivery risks and blockers. Brings a quality-first, process-oriented approach to SaaS implementation, customer onboarding, solution support and project coordination.

CORE SKILLS

- **Client & Delivery:** Requirement discussions, stakeholder coordination, workflow tracking, issue ownership, status and risk communication, documentation, Agile/Scrum.
- **Implementation & Validation:** Business process validation, UAT support, functional testing, API validation, release readiness, data consistency checks.
- **Tools:** Jira, Postman, Microsoft Excel, GenAI tools, Burp Suite (exposure), Selenium (basic).
- **Technical Foundation:** REST APIs, JSON, JavaScript, C++, Azure Cloud (exposure), CI/CD basics.

PROFESSIONAL EXPERIENCE

SDET | TO THE NEW June 2025 – Present

Client Project: PwC GST Compliance

- Worked across GST compliance workflows, translating business requirements and user stories into test scenarios and validation coverage across multiple modules.
- Designed, executed and maintained **300+ test cases** covering GSTR-1/1A, GSTR-2A/2B/IMS, GSTR-3B, GSTR-7 and audit workflows.
- Identified, tracked and validated **30+ defects** across UAT, Stage and Production environments using Jira; coordinated with developers and Business Analysts through resolution.
- Supported **5+ regression cycles** and handled **15+ user stories** in parallel within Agile/Scrum delivery cycles.
- Performed API testing using Postman, validating JSON responses, backend business logic, file-upload workflows and data consistency.
- Participated in sprint planning, backlog grooming and requirement discussions; clarified expected behaviour and communicated testing progress, risks and blockers to cross-functional stakeholders.
- Used Excel for test-data preparation and GenAI tools to accelerate test-case generation and documentation; gained exposure to Burp Suite and basic Selenium automation.

ACADEMIC PROJECT

Trendify Shopper — AI/ML Recommendation System

- Developed an academic recommendation system using regression and classification algorithms to suggest personalised products.
- Built data-preprocessing, model-training, evaluation and prediction workflows; explored user-behaviour analysis and product-ranking logic.

EDUCATION

B.Tech, ABES Engineering College 2021 – 2025

CGPA: 7.1/10
